My name is _____ and I'm a 48-yr-old man with chronic renal failure.

About 8 days ago, I underwent cadaveric renal transplant.

Today I was told I developed pathologically elevated creatinine levels.

My name is _____ and I'm a 32-year-old man with **Hodgkin's lymphoma**. A month ago I underwent bone marrow transplantation, my brother was the donor.

After transplantation I was put on a course of **immunosuppressants** and was monitored for white blood cell content, with no apparent abnormal findings since.

This week, I experienced really bad diarrhea bouts and they found out that I developed an **immune attack against my own intestine.**

My name is _____ and I'm a 32-year-old woman. I came to the emergency department because of sudden blindness. They asked about my history, and I told them about my right leg "giving out" from time to time, causing me to have episodes of weakness and falling.

In this morning's MRI they pointed out that I had periventricular plagues.

My name is _____ and I'm a clinical researcher studying how to make vaccines more effective. I just combined an experimental vaccine, with Freund's complete adjuvant. By this I obtained enhanced vaccine potency.

My name is _____ and I'm 8 years old. I have cystic fibrosis. Although I do everything I'm told to do by the grown-ups, my lungs keep getting infected with bacteria. I'm not so much bothered by that, but more that the effects of the infections are much stronger in my case than other children.
